J E Paisley is one of New Zealand's leading Common Rail Pump Specialist, with the most comprehensive and latest test equipment, available. We are the only Common Rail Specialist in New Zealand able to overhaul and test Bosch CP4 fuel pumps to pressures of 2500 bar. This has been achieved by the purchase of a Bosch EPS708 test bench and tools. The only EPS708 in New Zealand and the first CP4 capable bench in Australasia.

J E Paisley is the only fuel room in New Zealand equipped with a Bosch EPS205, a Hartridge Cri-PC and a IFR-50 flushing machine. This allows us to offer the most comprehensive common rail injector testing on all makes of common rail injectors. The Bosch EPS205 is capable of testing the latest Bosch and Siemens piezo injectors.

Bosch EPS205. The tester will perform the following checks;

Nozzle leakage test

Electrical leakage check

Spray pattern check

Electrical chatter check

Idle and Full load fuel delivery measurement

Backflow quantity

1st and 2nd opening pressures on two spring injectors

Bosch, Delphi, Denso and Siemens

The best available tools, for the best job
Equals the best diagnosis available for you and
your valued clients.

IFR-50 Flushing machine

Cri-PC One of only two in New Zealand, capable of testing 4 common rail injectors at once. Will measure response time and variation.
